

Semester Two, Week Six - Monday 21st August - Friday 25th August 2023

TECHNOLOGY HOSPITALITY

Senior Hospitality students have been completing grilling assessments. Students were given the opportunity to get creative and explore grilling food items on the BBQ. For some it was the first time they had turned on a BBQ and for others it was clear to see they were seasoned grill masters.

The students made flat bread to go with the sausages and onions and then had a slider challenge where classes competed against each other for the best BBQ slider creation. Congratulations to Jackson Davis who won this competition.

TECHNOLOGY - DIGI DESIGN

This term in Digi Design, we have focused on learning how to enhance and artistically manipulate images using Photoshop. Students have learned about colour, balance, clarity, macro, layers, recolouring and applying filters.

This is a collage of submissions where students have selected their favourite images that they have made adjustments to in Photoshop.

WOOD TECHNOLOGY Junior students from the Pallet Palace Module are honing their skills by practicing marking and cutting various types of joints that they will use to construct a small display shelf later in the term.

Empowering learners to succeed
